EXPERIENCE

Superior Traffic Services Software Engineering Intern 1/9/23 - 3/23/23

Ensured seamless operation of complex 24 hour systems responsible for public safety through the meticulous documentation and implementation of senior engineer code. Leveraged skills in Java Enterprise, to collaborate closely with seasoned engineers and dissect intricate codebases, enabling effective communication and knowledge transfer within a team.

Advanced Technology Group Software Engineering Intern 5/22/23 - 8/11/23

Contributed to the forefront of technology solution consulting within the realm of Salesforce and the Apex coding language. Collaborated with an elite team of professional developers by engaging in hands-on coding experience enhancing proficiency in both Apex development and the Salesforce platform by providing real business solutions to daily operational pain points in client business systems.
